NETWORKS
AN INTERNATIONAL JOURNAL

Subject Index to Volume 29, 1997

Algorithms
  Bellman–Ford, 111
  branch-and-cut, 55
  D-D-TREES, 1
  dual, Shortest Path Tree problem, 125
  dual ascient, 125
  Frank–Wolfe with PARTAN, 225
  message delay computation, 117
  PARTITION, 1
  polynomial-time, 151
  probabilistic, 173
  seal, 225
  Steiner tree, 89
  Tabu search, 161
And–fork/and–join constraint, 195
And–or graphs, replicated, reliability analysis, 195
ANDOS, 82

Ballot elections scheme, 81
Bellmanflord algorithm, 111
Bertsekas' small-label-first strategy, 111
Bipartite graph, maximum connectivity with prescribed degrees, 245
Bisection width, transposition network, 69
Bottleneck knapsack problems, 107
Branch-and-cut algorithm, resource-constrained Minimum-Weight Arborescence problem, 55
Butterfly network, 219

Capacitated Shortest Spanning Tree Problem, 161
Cayley graph, 69
Clustered Traveling Salesman Problem, 205
Combinatorial optimization, 173
Commodity decomposition, 225
Connectivity, bipartite graph with prescribed degrees, 245
Continuous tree center problem, 107
CONSTRUCT, 90

D-D-TREES algorithm, 1
de Bruijn digraphs, generalized, counting small cycles, 39
Delivery problem, restricted, 205
Delta-wye graph, 151
Demand nodes, 205
Digraphs, generalized de Bruijn, 39
Dijkstra's algorithm, dual interpretation, 125
Distributed task reliability, 195
Dual ascent algorithms, 125
Dual projected pseudo-quasi-Newton method, 225
Dual updating operations, dominance relationship, 125

Edge coloring, K-tree into smaller trees, 191
Election, electronic, 81

Failure, random, message delay, 117
Fragmentation-and-routing problem, 11
Frank–Wolfe with PARTAN algorithms, 225

Gossiping, staggered, 1
Graphs
  balanced, 77
  edge-transitive, 77
  embedding in cycles, minimum bandwidth problem, 135
  Layered Cross Product, 219
  m-partite, 77
  planarization, 173
  reach-preservable, 217
  3-separable, minimum-weight cycles, 151
  vertex weighted, 161
  well-covered, P-NP boundary, 29
Graph theoretic theorems, 205
Graph theory, 117
GRASP, 173
Greedy randomized adaptive search procedure, 173

Halin graphs, 151
Hamiltonian cycle, 35

Integer Linear Programming Model, 55
Interconnection networks, construction technique, 219
Interval routing, lower bound, 49
Intractable problems, message delay, 117

Jacobi method, 225

k-replicated and–or series-parallel, 195
K-tree, edge coloring into smaller trees, 191

Label correcting algorithm, 111
Labeling, optimal, 49
Label setting algorithm, 111
Layered Cross Product, 219

Max-flow/min-cut theorem, 77
Mesh, trees, 219
Message broadcasting, multiple, 1
Message delay, wireless networks, computation, 117
Minimum bandwidth problem, embedding graphs in cycles, 135
Minimum spanning tree, 89
Minimum-Weight Arborescence problem, resource-constrained, branch-and-cut algorithm, 55
Minimum-weight-cycle problem, polynomial-time algorithm, 151
Möbius function, 39
Multicommodity network flow, nonlinear, 225

Network flows
  balanced, 77
  multicommodity, nonlinear, 225

Packet fragmentation, optimal, 11
PARTITION algorithm, 1
Path exchange, Steiner tree algorithms, 89
Planarization, graphs, 173
Polynomial dual ascent algorithms, 125
Polynomial-time algorithm, minimum-weight-cycle problem, 151
Postal model, multiple message broadcasting, 1
Probabilistic algorithm, 173
Probabilistic graph models, 117
Public network, secure voting system, 81

Radio broadcast, message delay computation, 117
Reach-preservable graphs, 217
REBUILD, 90
RECONSTRUCT, 92
Reliability analysis, replicated and–or graphs, 195
Resource-Constrained Minimum-Weight Arborescence problem, branch-and-cut algorithm, 55
Routing
  interval, lower bound, 49
  optimal, 11

Seal algorithm, 225
Shortest-path problem, 89
  small-label-first strategy, 111
  time-varying with constraints, 141
Shortest Path Tree problem, dual algorithms, 125
Shortest Spanning Tree Problem, capacitated, 161
Small-label-first–shortest arc first strategy, 111
Small-label-first strategy, 111
Spanning trees, reach-preservable graphs, 217
Sparse-matrix technique, 225
SPATHS, 89
Steiner problem in graphs, 89
Steiner tree algorithms, efficient path and vertex exchange, 89
Steiner vertex, efficient selection, 89
SVERTEX, 89

Tabu search algorithm, 161
Telephone model, 1
Transposition network, bisection width, 69
Tree center problems, 107
Trees, mesh, 219
Triangle inequality, 205

Vertex exchange, Steiner tree algorithms, 89
Voting system, secure, 81

Waiting times, 141
Walks, nonperiodic closed, 39
Warehouses, 205
Wireless networks, message delay computation, 117
